In re Application of

FM EXAMINERS

)
)

Ringer proposes a 4.3 kW E.R.P. facility with 114 m HAAT which will be short-spaced to WITF. WITF does not consent to this proposal,¹ especially in light of the fact that at least two applicants for Channel 280A at Westerville are proposing 6.0 kW E.R.P. equivalent facilities fully-spaced to WITF.²

Accordingly, good cause exists to accept WITF's informal objection against Ringer's pending application.

Respectfully submitted,

WITF, Inc.

¹ See, Section 73.213(c) of the Rules.

² As part of the Commission's proceeding adopting Section 73.215 of its rules concerning contour protection, the plain language of the Memorandum Opinion and Order, on reconsideration, states that the rule would allow site selection flexibility where "no fully spaced sites are available." Amendment of Part 73 of the Commission Rules to Permit Short-space Station Assignment by Using Directional Antennas 6 FCC Rcd 4356, paragraph 27, (1991).
